ABOUT ME

Experienced Data Analyst with a strong foundation in Data Analysis, RPA technologies, and Finance. Passionate in dealing with large amount of structured & unstructured data and draw meaningful conclusions from them. My career aspiration is to secure a position in Data Analysis within an organization that fosters professional growth and rewards high performance and quality.

WORK EXPERIENCE

Proffesional Data Analyst
DHL Express (GHO) Oct 2022 – Current | Maastricht, Netherlands

- Data Analysis and Interpretation - Transform complex duty billing data into actionable insights, driving business decisions and process improvements
- Manage the preparation and cleaning of data for analysis (numerical & categorical)
- Develop data visualizations and dashboards, aiding stakeholders in decision-making
- Demonstrate problem-solving skills in addressing all data pain points & in navigating issues, bugs, and roadblocks encountered during the data analysis process
- Collaborate with various teams: providing support in understanding data & translating their business inquiries into data-focused questions for additional value

Data Analyst
DHL Express (EUHQ) Oct 2021 – Sep 2022 | Brussels, Belgium

- Solution architecture and implementation to transition the existing investment case review process into a digital workflow
- Automated document creation for investment cases using Excel, SQL Server, and RPA technologies
- Managed and engineered data, and developed Power BI KPI reporting dashboards
- Established a digital submission and review process for the investment proposal pipeline using SharePoint and web application development
- Improved the existing database and automated data storage procedures

Financial Analyst
FAIS Group Apr – Sep 2021 | Athens, Greece

- Prepared reports and projections to analyze the profit & loss statement
- Managed cash flow, including liquidity planning and control, to ensure financial stability
- Coordinated payments and maintained close contact with banks to ensure smooth financial transactions
- Oversaw daily financial operations, including accounts payable, accounts receivable, invoicing, and orders
- Assisted in the annual budgeting and business planning process
